NOTES: The purpose of this infographic is to show the evolution of Superman's appearance since his debut in 1938. We've attempted to include examples from comic book artists who made the biggest contribution to Superman's look, including examples from Superman's co-creator Joe Shuster, Wayne Boring, Win Mortimer, Jack Kirby, Curt Swan, Neal Adams, José Luis García-López, John Byrne, Dan Jurgens, Alex Ross, Jim Lee, Gary Frank, and many more. The section on "Elseworlds and Other Comic Book Variations" is far from complete, however we deemed it important to show some of the more prominent examples of how Superman's appearance has been modified in these types of "imaginary" stories over the years.
